The Paycheck Fairness Act

JANUARY 2019

The landmark Equal Pay Act of 1963 made it illegal for employers to pay unequal wages to men and women who perform substantially equal work. The Equal Pay Act and the civil rights laws that followed helped change the workplace and began to combat wage inequality, but these laws have not closed the persistent gap between women’s and men’s wages.

Today, women who work full time, year-round are paid, on average, only 80 cents for every dollar paid to men, resulting in a gap of $10,169 each year.¹ The gap exists in every state, regardless of geography, occupation, education or work patterns. And it is worse for women of color: On average, Latinas are typically paid 53 cents, Native American women 58 cents and Black women just 61 cents for every dollar paid to white, non-Hispanic men.² White, non-Hispanic women are paid 77 cents and Asian women 85 cents for every dollar paid to white, non-Hispanic men, although some ethnic subgroups of Asian women fare much worse.³

The Paycheck Fairness Act would help to close these punishing gaps by eliminating loopholes in the Equal Pay Act, helping to break harmful patterns of pay discrimination and strengthening workplace protections for women. It is a reasonable and comprehensive bill that would combat the wage discrimination that has plagued the nation for decades.

Key Provisions of the Paycheck Fairness Act

For employees, the Paycheck Fairness Act would:

- Protect against retaliation for discussing salaries with colleagues;
- Prohibit employers from screening job applicants based on their salary history or requiring salary history during the interview and hiring process;
- Require employers to prove that pay disparities exist for legitimate, job-related reasons;
- Provide plaintiffs who file sex-based wage discrimination claims under the Equal Pay Act with the same remedies as are available to plaintiffs who file race- or ethnicity-based wage discrimination claims under the Civil Rights Act;
- Remove obstacles in the Equal Pay Act to facilitate plaintiffs’ participation in class action lawsuits that challenge systemic pay discrimination; and
- Create a negotiation skills training program for women and girls.
For employers, the Paycheck Fairness Act would:

- Recognize excellence in pay practices; and
- Provide assistance to businesses of all sizes that need help with their equal pay practices.

For enforcement agencies, the Paycheck Fairness Act would:

- Help ensure the Department of Labor (DOL) uses the full range of investigatory tools to uncover wage discrimination, including collecting federal contractors’ wage data;
- Direct the Equal Employment Opportunity Commission to conduct a survey of available wage information to assist federal agencies in enforcing wage discrimination laws and creating a system to collect wage data; and
- Instruct DOL to conduct studies and review available research and data to provide information on how to identify, correct and eliminate illegal wage disparities.

Women, Families and the Nation Cannot Afford to Wait

- **Women’s wages are key to their families’ economic security.** Mothers are primary or sole breadwinners in half of U.S. households with children, and just over one-quarter of female-headed households have incomes that fall below the poverty level.
- **As a group, the wage gap costs women who are employed full time in the United States more than $900 billion every year.** These lost wages mean families have less money to spend on goods and services that help drive economic growth and less money to save for education, home ownership and retirement.
- **At the current rate, the wage gap will not close until 2059.** That means wage inequities will persist and compound year after year for women and their families, affecting their incomes now and their retirement income and savings in the future.

The Public Overwhelmingly Supports Fair Pay Policies

Nearly nine in 10 voters support policies that would address pay discrimination, such as the Paycheck Fairness Act. In a 2016 nationwide survey, 89 percent of registered voters said they would favor – and 57 percent said they would “strongly favor” – policies that hold employers accountable for pay discrimination, protect workers from employer retaliation and provide training in salary negotiation for women and girls.

It is past time for Congress to pass the Paycheck Fairness Act. For more information on the wage gap in your state, visit NationalPartnership.org/Gap.

round with that of Native American women working full time, year-round as reported in the American Community Survey. The median annual earnings of white, non-Hispanic men in 2017 in this source was $58,014.

3 See note 1. Despite an overall wage gap for Asian women in the United States that is smaller than for other groups of women of color, there are substantial variations in the wage gap between particular ethnic groups of Asian women and white, non-Hispanic men, with many subpopulations of Asian women facing significantly greater wage penalties.
