IN THE SENATE OF THE UNITED STATES

\_\_\_\_\_ introduced the following bill; which was read twice and referred to the Committee on \_\_\_\_\_

---

**A BILL**

To allow Americans to earn paid sick time so that they can address their own health needs and the health needs of their families.

1 *Be it enacted by the Senate and House of Representa-*  
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Healthy Families Act”.

5 **SEC. 2. FINDINGS.**

6 Congress makes the following findings:

7 (1) Working Americans need time to meet their  
8 own health care needs and to care for family mem-  
9 bers, including their children (including daughters-  
10 in-law and sons-in-law), spouse, domestic partner,

1 parents (including parents-in-law), and other chil-  
2 dren and adults for whom they are caregivers.

3 (2) Health care needs include preventive health  
4 care, diagnostic procedures, medical treatment, and  
5 recovery in response to short- and long-term ill-  
6 nesses and injuries.

7 (3) Providing employees time off to meet health  
8 care needs ensures that they will be healthier in the  
9 long run. Preventive care helps avoid illnesses and  
10 injuries and routine medical care helps detect ill-  
11 nesses early and shorten their duration. A 2012  
12 study published by BioMed Central Public Health of  
13 results of the National Health Interview Survey  
14 found that lack of paid sick leave is a barrier to re-  
15 ceiving cancer screenings and preventive care. Work-  
16 ers with paid sick leave were more likely to have a  
17 mammogram, Pap test, or endoscopy, and were  
18 more likely to have visited a doctor in the previous  
19 year, than workers without paid sick leave, even  
20 when the results were adjusted for sociodemographic  
21 factors.

22 (4) When parents are available to care for their  
23 children who become sick, children recover faster,  
24 more serious illnesses are prevented, and children's  
25 overall mental and physical health improve. In a

1       2009 study published in the American Journal of  
2       Public Health, 81 percent of parents of a child with  
3       special health care needs reported that taking leave  
4       from work to be with their child had a “good” or  
5       “very good” effect on their child’s physical health.  
6       Similarly, 85 percent of parents of such a child  
7       found that taking such leave had a “good” or “very  
8       good” effect on their child’s emotional health.

9               (5) When parents cannot afford to miss work  
10       and must send children with contagious illnesses to  
11       child care centers or schools, infection can spread  
12       rapidly through child care centers and schools.

13              (6) Providing paid sick time improves public  
14       health by reducing infectious disease. Policies that  
15       make it easier for sick adults and children to be iso-  
16       lated at home reduce the spread of infectious dis-  
17       ease. A 2012 study published in the American Jour-  
18       nal of Public Health found that a lack of workplace  
19       policies like paid sick days contributed to an addi-  
20       tional 5,000,000 cases of influenza-like illness dur-  
21       ing the H1N1 pandemic of 2009.

22              (7) Routine medical care reduces medical costs  
23       by detecting and treating illness and injury early,  
24       decreasing the need for emergency care. These sav-  
25       ings benefit public and private payers of health in-

1       surance, including private businesses. A 2011 study  
2       by the Institute for Women’s Policy Research found  
3       that a universal paid sick days policy would reduce  
4       preventable visits to the emergency room and result  
5       in cost savings of \$1,100,000,000 per year, includ-  
6       ing \$500,000,000 in savings for public health insur-  
7       ance like Medicaid.

8               (8) The provision of individual and family sick  
9       time by large and small businesses, both here in the  
10      United States and elsewhere, demonstrates that pol-  
11      icy solutions are both feasible and affordable in a  
12      competitive economy. A 2009 study by the Center  
13      for Economic and Policy Research found that, of 22  
14      countries with comparable economies, the United  
15      States was 1 of only 3 countries that did not provide  
16      any paid time off for workers with short-term ill-  
17      nesses.

18              (9) Measures that ensure that employees are in  
19      good health and do not need to worry about unmet  
20      family health problems help businesses by promoting  
21      productivity and reducing employee turnover.

22              (10) The American Productivity Audit com-  
23      pleted in 2003 found that lost productivity due to ill-  
24      ness costs \$226,000,000,000 annually, and that 71  
25      percent of that cost stems from presenteeism, the

1 practice of employees coming to work despite illness.  
2 Studies in the *Journal of Occupational and Environ-*  
3 *mental Medicine*, the *Employee Benefit News*, and  
4 the *Harvard Business Review* show that  
5 presenteeism is a larger productivity drain than ei-  
6 ther absenteeism or short-term disability.

7 (11) Working while sick also increases a work-  
8 er's probability of suffering an injury on the job. A  
9 2012 study published by the *American Journal of*  
10 *Public Health* found that workers with access to  
11 paid sick leave were 28 percent less likely than  
12 workers without paid sick leave to suffer nonfatal  
13 occupational injuries.

14 (12) The absence of paid sick time has forced  
15 Americans to make untenable choices between need-  
16 ed income and jobs on the one hand and caring for  
17 their own and their family's health on the other.

18 (13) Nearly 40 percent of the private sector  
19 workforce, and 25 percent of the public sector work-  
20 force, lacks paid sick time. Another 4,000,000 theo-  
21 retically have access to sick time, but have not been  
22 on the job long enough to use it. Millions more lack  
23 sick time they can use to care for a sick child or ill  
24 family member.

1           (14)(A) Workers' access to paid sick time varies  
2 dramatically by wage level.

3           (B) For private sector workers—

4               (i) for workers in the lowest quartile of  
5 earners, 71 percent lack paid sick time;

6               (ii) for workers in the next 2 quartiles, 36  
7 and 25 percent, respectively, lack paid sick  
8 time; and

9               (iii) even for workers in the highest quar-  
10 tile, 16 percent lack paid sick time.

11          (C) For public sector workers—

12               (i) for workers in the lowest quartile of  
13 earners, 25 percent lack paid sick time;

14               (ii) for workers in the next 2 quartiles, 7  
15 percent lack paid sick time; and

16               (iii) for workers in the highest quartile, 2  
17 percent lack paid sick time.

18          (D) In addition, millions of workers cannot use  
19 paid sick time to care for ill family members.

20          (15) Due to the roles of men and women in so-  
21 ciety, the primary responsibility for family caregiving  
22 often falls on women, and such responsibility affects  
23 the working lives of women more than it affects the  
24 working lives of men.

1           (16) An increasing number of men are also tak-  
2           ing on caregiving obligations, and men who request  
3           paid time for caregiving purposes are often denied  
4           accommodation or penalized because of stereotypes  
5           that caregiving is only “women’s work”.

6           (17) Employers’ reliance on persistent stereo-  
7           types about the “proper” roles of both men and  
8           women in the workplace and in the home continues  
9           a cycle of discrimination and fosters stereotypical  
10          views about women’s commitment to work and their  
11          value as employees.

12          (18) Employment standards that apply to only  
13          one gender have serious potential for encouraging  
14          employers to discriminate against employees and ap-  
15          plicants for employment who are of that gender.

16          (19) It is in the national interest to ensure that  
17          all Americans can care for their own health and the  
18          health of their families while prospering at work.

19          (20) Nearly 1 in 3 American women report  
20          physical or sexual abuse by a husband or boyfriend  
21          at some point in their lives. Domestic violence also  
22          affects men. Women account for about 85 percent of  
23          the victims of domestic violence and men account for  
24          approximately 15 percent of the victims. Therefore,  
25          women disproportionately need time off to care for

1       their health or to find solutions, such as obtaining  
2       a restraining order or finding housing, to avoid or  
3       prevent physical or sexual abuse.

4           (21) One study showed that 85 percent of do-  
5       mestic violence victims at a women's shelter who  
6       were employed missed work because of abuse. The  
7       mean number of days of paid work lost by a rape  
8       victim is 8.1 days, by a victim of physical assault is  
9       7.2 days, and by a victim of stalking is 10.1 days.  
10       Nationwide, domestic violence victims lose almost  
11       8,000,000 days of paid work per year.

12           (22) Without paid sick days that can be used  
13       to address the effects of domestic violence, these vic-  
14       tims are in grave danger of losing their jobs. One  
15       survey found that 96 percent of employed domestic  
16       violence victims experienced problems at work re-  
17       lated to the violence. The Government Accountability  
18       Office similarly found that 24 to 52 percent of vic-  
19       tims report losing a job due, at least in part, to do-  
20       mestic violence. The loss of employment can be par-  
21       ticularly devastating for victims of domestic violence,  
22       who often need economic security to ensure safety.

23           (23) The Centers for Disease Control and Pre-  
24       vention has estimated that domestic violence costs

1 over \$700,000,000 annually due to the victims' lost  
2 productivity in employment.

3 (24) Efforts to assist abused employees result  
4 in positive outcomes for employers as well as em-  
5 ployees because employers can retain workers who  
6 might otherwise be compelled to leave.

7 **SEC. 3. PURPOSES.**

8 The purposes of this Act are—

9 (1) to ensure that all working Americans can  
10 address their own health needs and the health needs  
11 of their families by requiring employers to permit  
12 employees to earn up to 56 hours of paid sick time  
13 including paid time for family care;

14 (2) to diminish public and private health care  
15 costs by enabling workers to seek early and routine  
16 medical care for themselves and their family mem-  
17 bers;

18 (3) to assist employees who are, or whose fam-  
19 ily members are, victims of domestic violence, sexual  
20 assault, or stalking, by providing the employees with  
21 paid time away from work to allow the victims to re-  
22 ceive treatment and to take the necessary steps to  
23 ensure their protection;

24 (4) to address the historical and persistent  
25 widespread pattern of employment discrimination on

1 the basis of gender by both private and public sector  
2 employers;

3 (5) to accomplish the purposes described in  
4 paragraphs (1) through (4) in a manner that is fea-  
5 sible for employers; and

6 (6) consistent with the provision of the 14th  
7 Amendment to the Constitution relating to equal  
8 protection of the laws, and pursuant to Congress'  
9 power to enforce that provision under section 5 of  
10 that Amendment—

11 (A) to accomplish the purposes described  
12 in paragraphs (1) through (4) in a manner that  
13 minimizes the potential for employment dis-  
14 crimination on the basis of sex by ensuring gen-  
15 erally that paid sick time is available for eligible  
16 medical reasons on a gender-neutral basis; and

17 (B) to promote the goal of equal employ-  
18 ment opportunity for women and men.

16 less than 1 hour of paid sick time for every 30 hours  
17 worked, to be used as described in subsection (b).  
18 An employer shall not be required to permit an em-  
19 ployee to earn, under this section, more than 56

21 the employer chooses to set a higher limit.

23           (A) IN GENERAL.—Except as provided in  
24 paragraph (3), for purposes of this section, an

2           Standards Act of 1938 (29 U.S.C. 213(a)(1))  
3           shall be assumed to work 40 hours in each  
4           workweek.

5           (B) SHORTER NORMAL WORKWEEK.—If  
6           the normal workweek of such an employee is  
7           less than 40 hours, the employee shall earn

9           week.

10          (3) DATES OF ACCRUAL AND USE.—Employees  
11          shall begin to earn paid sick time under this section  
12          at the commencement of their employment. An em-  
13          ployee shall be entitled to use the earned paid sick  
14          time beginning on the 60th calendar day following  
15          commencement of the employee’s employment. After  
16          that 60th calendar day, the employee may use the
