Hormonal Physiology of Childbearing: Evidence and Implications for Women, Babies, and Maternity Care

Sarah J. Buckley
January 2015

Contents with Full Outline
Abstract ........................................................................................................................................ i
Figures and Tables .......................................................................................................................... iii
Message from Debra L. Ness .......................................................................................................... iv
Foreword ........................................................................................................................................ v
Preface ........................................................................................................................................... vii
Acknowledgments ........................................................................................................................ x
Executive Summary ....................................................................................................................... x

1 Introduction: Overarching Themes and Scope ......................................................................... 1
  1.1 Human Childbearing: Evolution and Safety ........ 2
  1.2 Contemporary Childbirth Practices ............ 2
  1.3 Current Understandings of the Hormonal Physiology of Childbearing ........ 4
    1.3.1 Benefits for Mothers and Babies .......... 4
    1.3.2 Possible Impacts of Maternity Care interventions .... 5
    1.3.3 The Hormonal Physiology Pathway ....... 5
  1.4 Alignment with Other Frameworks .......... 7
  1.5 Scope of This Report .................. 10
    1.5.1 Content and Organization .......... 10
    1.5.2 Inclusion of Animal Studies ....... 11
  1.6 Introduction: Summary ............ 11

2 Physiologic Onset of Labor and Scheduled Birth ................................................................ 14
  2.1 Physiologic Onset of Labor at Term ........ 15
    2.1.1 Quiescent Phase .............. 15
    2.1.2 Activation Phase ............ 16
    2.1.3 Stimulation Phase ........... 18
  2.2 Possible Impacts of Scheduled Birth ........ 20
  2.3 Physiologic Onset of Labor and Scheduled Birth: Summary ........ 24
    2.3.1 Physiologic Onset of Labor .......... 24
    2.3.2 Possible Impacts of Scheduled Birth ........ 25

3 Oxytocin ...................................................................................................................................... 26
  3.1 Oxytocin: Normal Physiology .......... 27
    3.1.1 Oxytocin: Introduction .......... 27
      Oxytocin Effects ........... 28
      Physiologic roles of oxytocin .......... 29
      Psychological and therapeutic roles of oxytocin .......... 30
      Oxytocin Regulation and Receptors .......... 31

3.2.4 Opioid Analgesic Drugs: Possible Impacts on Oxytocin Physiology .......... 73
   Opioid Drugs and the Mother .......... 73
   Opioid Drugs and the Fetus/Newborn .......... 74
   Opioid Drugs and Breastfeeding .......... 74
   Opioid Drugs and Offspring, Longer Term .......... 75

3.2.5 Epidural Analgesia: Possible Impacts on Oxytocin Physiology .......... 75
   Epidural Analgesia and the Mother .......... 75
   Epidural analgesia and oxytocin systems in labor .......... 76
   Epidural analgesia and maternal temperature regulation in labor .......... 77
   Epidural Analgesia and the Fetus/Newborn .......... 77
   Epidural Analgesia and Breastfeeding .......... 78
   Epidural Analgesia and Maternal Adaptations .......... 79
   Epidural impacts on Memory and Reward .......... 80

3.2.6 Cesarean Section: Possible Impacts on Oxytocin Physiology .......... 81
   Cesarean and the Mother .......... 83
   Cesarean and the Fetus/Newborn .......... 84
   Cesarean and Breastfeeding .......... 85
   Cesarean and Maternal Adaptations and Attachment .......... 85
   Cesarean and psychological well-being .......... 85
   Cesarean and attachment .......... 86
   Cesarean and Offspring, Longer Term .......... 87

3.2.7 Early Separation of Healthy Mothers and Newborns: Possible Impacts on Oxytocin .......... 88
   Early Separation and the Mother .......... 88
   Early Separation and the Newborn .......... 89
   Early Separation and Breastfeeding .......... 89
   Early Separation and Maternal Adaptations and Attachment .......... 89
   Early separation and attachment .......... 89
   Early separation and maternal well-being .......... 90

3.3 Oxytocin Physiology: Summary .......... 90
3.3.1 Oxytocin: Normal Physiology .......... 90
3.3.2 Common Maternity Care Practices That May Impact Oxytocin Physiology .......... 91

4 Beta-Endorphins ........................................................................................................... 93
4.1 Beta-Endorphins: Normal Physiology .......... 94
4.1.1 Beta-Endorphins: Introduction .......... 94
    Beta-Endorphins Effects .......... 94
    Beta-endorphins and the stress response .......... 95
    Beta-endorphins, other effects .......... 95
### Beta-Endorphins: Regulation and Receptors

- Beta-endorphins receptors ........ 96
- Beta-endorphins complexities ....... 97

### 4.1.2 Beta-Endorphins in Pregnancy ........ 97

### 4.1.3 Beta-Endorphins in Labor and Birth ........ 98

- Maternal Beta-Endorphins In Labor and Birth ........ 98
- Fetal Beta-Endorphins in Labor and Birth ........ 100

### 4.1.4 Beta-Endorphins after Birth ........ 100

- Maternal Beta-Endorphins after Birth ........ 100
- Newborn and Later Beta-Endorphins ........ 101
- Beta-Endorphins and Breastfeeding ........ 101
- Beta-Endorphins and Maternal Adaptations and Attachment

### 4.2 Common Maternity Care Practices That May Impact Beta-Endorphins Physiology ........ 102

#### 4.2.1 Maternity Care Provider and Birth Environment: Possible Impacts on Beta-Endorphins ........ 103

#### 4.2.2 Prostaglandins for Cervical Ripening and Labor Induction: Possible Impacts on Beta-Endorphins ........ 103

#### 4.2.3 Synthetic Oxytocin for Induction, Augmentation, and Postpartum Care: Possible Impacts on Beta-Endorphins ........ 103

#### 4.2.4 Opioid Analgesic Drugs: Possible Impacts on Beta-Endorphins ........ 104

- Opioid Drugs and the Mother ........ 104
- Opioid Drugs and the Fetus/Newborn ........ 104

#### 4.2.5 Epidural Analgesia: Possible Impacts on Beta-Endorphins ........ 105

- Epidural Analgesia and the Mother ........ 106
- Epidural Analgesia and the Fetus/Newborn ........ 107

#### 4.2.6 Cesarean Section: Possible Impacts on Beta-Endorphins ........ 107

- Cesarean and the Mother ........ 107
- Cesarean and the Fetus/Newborn ........ 108

#### 4.2.7 Early Separation of Healthy Mothers and Newborns: Possible Impacts on Beta-Endorphins ........ 108

### 4.3 Beta-Endorphins: Summary ........ 109

#### 4.3.1 Beta-Endorphins: Normal Physiology ........ 109

#### 4.3.2 Common Maternity Care Practices That May Impact Beta-Endorphins Physiology ........ 110

### 5 Epinephrine-Norepinephrine and Related Stress Hormones

- Epinephrine-Norepinephrine and Related Stress Hormones: Normal Physiology ........ 112

#### 5.1 Epinephrine-Norepinephrine and Related Stress Hormones: Introduction ........ 112

- Epinephrine-Norepinephrine and Related Stress Hormones Effects ........ 112
- Epinephrine-Norepinephrine and Related Stress Hormones: Regulation and Receptors ........ 114

#### 5.1.2 Epinephrine-Norepinephrine and Related Stress Hormones in Pregnancy ........ 115

- Maternal Epinephrine-Norepinephrine and Related Stress Hormones in Pregnancy ........ 115
- Fetal Epinephrine-Norepinephrine and Related Stress Hormones in Pregnancy ........ 116
5.1.3 Epinephrine-Norepinephrine and Related Stress Hormones in Labor And Birth .......... 117
   Evolutionary Model .......... 117
   Maternal Epinephrine-Norepinephrine and Related Stress Hormones in Labor and Birth .......... 118
      Maternal epinephrine-norepinephrine in labor and birth .......... 118
      The fetus ejection reflex .......... 120
      Maternal related stress hormones in labor and birth .......... 121
   Fetal Epinephrine-Norepinephrine and Related Stress Hormones in Labor and Birth .......... 121
      Fetal catecholamine surge .......... 121
      Fetal cortisol .......... 123

5.1.4 Epinephrine-Norepinephrine and Related Stress Hormones after Birth .......... 123
   Maternal Epinephrine-Norepinephrine and Related Stress Hormones After Birth .......... 123
   Newborn and Later Epinephrine-Norepinephrine and Related Stress Hormones .......... 124
   Epinephrine-Norepinephrine and Related Stress Hormones, and Breastfeeding and Maternal Adaptations and Attachment .......... 124

5.2 Common Maternity Care Practices That May Impact Epinephrine-Norepinephrine and Related Stress Hormones .......... 125
5.2.1 Maternity Care Provider and Birth Environment, Including Prenatal and Childbirth Care: Possible Impacts on Epinephrine-Norepinephrine and Related Stress Hormones .......... 125
   Prenatal Care and Stress .......... 126
   Childbirth and Stress .......... 127
   Labor and Birth Stress in Animals .......... 129
5.2.2 Prostaglandins for Cervical Ripening and Labor Induction: Possible Impacts on Epinephrine-Norepinephrine and Related Stress Hormones .......... 130
5.2.3 Synthetic Oxytocin For Induction, Augmentation, and Postpartum Care: Possible Impacts on Epinephrine-Norepinephrine and Related Stress Hormones .......... 130
5.2.4 Opioid Analgesic Drugs: Possible Impacts on Epinephrine-Norepinephrine and Related Stress Hormones .......... 131
5.2.5 Epidural Analgesia: Possible Impacts on Epinephrine-Norepinephrine and Related Stress Hormones .......... 131
   Epidural Analgesia and the Mother .......... 131
   Epidural Analgesia and the Fetus/Newborn .......... 133
5.2.6 Cesarean Section: Possible Impacts on Epinephrine-Norepinephrine and Related Stress Hormones .......... 134
   Cesarean and the Mother .......... 135
   Cesarean and the Fetus/Newborn .......... 135
5.2.7 Early Separation of Healthy Mothers and Newborns: Possible Impacts on Epinephrine-Norepinephrine and Related Stress Hormones .......... 136
5.3 Epinephrine-Norepinephrine and Related Stress Hormones: Summary .......... 138
5.3.1 Epinephrine-Norepinephrine and Related Stress Hormones: Normal Physiology .......... 138
5.3.2 Common Maternity Care Practices that May Impact Epinephrine-Norepinephrine and Related Stress Hormones Physiology .......... 139

6 Prolactin .............................................................................................................................................................................. 140
6.1 Prolactin: Normal Physiology .......... 141
6.1.1 Prolactin: Introduction .......... 141
  
  Prolactin Effects .......... 141
  Prolactin Regulation and Receptors .......... 142
  
6.1.2 Prolactin in Pregnancy .......... 143
  
  Maternal Prolactin in Pregnancy .......... 143
  Fetal Prolactin in Pregnancy .......... 144
  
6.1.3 Prolactin in Labor and Birth .......... 144
  
  Maternal Prolactin in Labor and Birth .......... 144
  Fetal Prolactin in Labor and Birth .......... 145
  
6.1.4 Prolactin after Birth .......... 145
  
  Maternal Prolactin after Birth .......... 145
  Newborn and Later Prolactin .......... 146
  Prolactin and Breastfeeding .......... 146
  
  Prolactin release with lactation .......... 147
  Prolactin receptor theory .......... 147
  
  Prolactin and Maternal Adaptations .......... 148
  
6.2 Common Maternity Care Practices That May Impact Prolactin Physiology .......... 149
6.2.1 Maternity Care Provider and Birth Environment: Possible Impacts on Prolactin .......... 149
6.2.2 Prostaglandins for Cervical Ripening and Labor Induction: Potential Impacts on Prolactin .......... 149
6.2.3 Synthetic Oxytocin For Induction, Augmentation, and Postpartum Care: Possible Impacts on Prolactin .......... 150
6.2.4 Opioid Analgesic Drugs: Possible Impacts on Prolactin .......... 151
6.2.5 Epidural Analgesia: Possible Impacts on Prolactin .......... 151
6.2.6 Cesarean Section: Possible Impacts on Prolactin .......... 152
6.2.7 Early Separation of Healthy Mothers and Newborns: Possible Impacts on Prolactin .......... 154
  
6.3 Prolactin: Summary .......... 154
6.3.1 Prolactin: Normal Physiology .......... 154
6.3.2 Common Maternity Care Practices That May Impact Prolactin Physiology .......... 155
  
7 Conclusions and Recommendations .............................................................................................................................................. 156
7.1 Conclusions .......... 157
7.2 Recommendations to Promote, Support, and Protect Physiologic Childbearing .......... 163
7.2.1 Education, Policy, and Consumer Engagement Recommendations .......... 163
  
  Education .......... 163
  Policy .......... 164
  Engaging and Supporting Childbearing Women .......... 165
7.2.2 Care Practice Recommendations Whenever Safely Possible .......... 165
  Prenatal Care .......... 165
  Postpartum Care .......... 168
7.2.3 Research Recommendation .......... 169
7.3 Conclusions and Recommendations: Summary .......... 169

Appendix: Resources for Learning More and Improving Practice ......................................................... 171
