

Paid Leave Means A Stronger Washington

JANUARY 2018

Washington state will soon be home to the fifth state paid family and medical leave program in the United States. Washington state enacted a comprehensive paid family and medical leave law in 2017 and is in the process of implementation. In 2020, when it's in full effect, the program will provide 12 weeks of paid family leave and 12 weeks of paid medical leave, including for pregnancy – capped at 16 weeks per year – with two additional weeks for pregnancy-related medical complications. Washington's plan passed with bipartisan support, builds on lessons learned from older state programs and is among the most progressive.¹

Washingtonians are caught between their work and family responsibilities.

People in Washington both work and provide care

- ▶ In 64 percent of all Washington households with children – more than one million homes – all parents have paying jobs.²
- ▶ Women's wages support their households. In Washington, 72 percent of Black mothers, 52 percent of Latina mothers and 47 percent of white mothers are key family breadwinners.³
- ▶ Women make up nearly half of Washington's labor force (46 percent) and more than one-quarter of its business owners (29 percent).⁴
- ▶ Across the country, many men want to play a larger role in caring for their children,⁵ but unsupportive policies and stigma hold them back.⁶

Paid leave means not having to choose between job and family.

Washington families are facing family and medical care needs.

- ▶ More than one in five workers are age 55 and older.⁷
- ▶ In less than 15 years, the share of the state's population age 65 and older will grow by more than one-third.⁸
- ▶ Older workers are more likely to experience serious medical conditions that require care.⁹
- ▶ Three people die every day from drug overdoses in Washington.¹⁰

Paid leave means older adults and working people of all ages can get the support they need to receive and provide critical care.

The state's caregiving needs are significant, and growing

Washington will soon see the benefits of paid leave for workers, families and businesses.

**Washington's
paid leave
program will
soon help
millions**

- ▶ Paid leave helps improve health outcomes and helps working people remain economically secure and stay connected to their jobs.
- ▶ Businesses' employee retention can also improve significantly with paid leave, helping to strengthen bottom lines.
- ▶ State programs are used as intended by workers without overburdening employers.¹¹

Paid leave means people can care for their families or health without jeopardizing their economic security, reducing turnover for employers and boosting the economy.

Washington will soon add to the growing body of evidence that paid leave programs work – and that there is a common sense, tested approach that works for families, businesses and economies.

But, people's access to paid leave shouldn't depend on where they live or work or what job they hold. A paid leave policy for the nation would build on state models. It would:

- ▶ Be cost-effective for workers, employers and the government;
- ▶ Cover all working people, apply equally to men and women and reflect a modern definition of family;
- ▶ Include the well-established reasons people need family and medical leave;
- ▶ Provide at least 12 weeks of leave and replace a substantial share of workers' usual wages; and
- ▶ Protect workers against adverse consequences for taking leave.

**A real
national paid
leave plan – the
FAMILY Act – is
the solution**

The Family and Medical Insurance Leave (FAMILY) Act is the only federal proposal that meets these criteria. **The FAMILY Act means a stronger economy, healthier families and businesses, and greater workplace equality for women.**
