Paid Leave Means A Stronger Utah

FEBRUARY 2024

Most working people in the United States do not have paid family leave through their jobs, including **about 75 percent** — **about 1,360,000 workers** — **in Utah.**¹ **Even** *unpaid* **leave under the federal Family and Medical Leave Act is inaccessible for 65 percent of Utahns.**² The lack of paid leave exacerbates the state's economic and care challenges — from the cost of living, to a scarcity of reproductive and maternal health care, to an aging population, with devastating costs for Utahns and their families, public health and the economy.

Impossible choices between work and family are hurting Utah's economy, and women suffer most. Paid leave means people — especially women — aren't forced to leave the labor force to care for their families or health.

Utah's economy and families are suffering

- If women in Utah participated in the labor force at the same rate as women in countries with paid leave, there would be an estimated 59,000 additional workers in the state and \$1.7 billion more wages earned statewide.³
- Nationally, if women participated in the U.S. labor force at the same rate as in Germany and Canada, our economy would benefit from more than \$775 billion in additional economic activity each year.⁴
- In Utah, a typical worker who takes four weeks of unpaid leave loses more than more than \$3,400 in income.^₅
- Paid leave improves employee retention, morale and productivity, reducing turnover for employers of all sizes and boosting the economy. But small employers often cannot provide the benefit and universal paid leave would help them do that.⁶

Utahns are caught between their work and family responsibilities. Paid leave means not having to choose between job and family.

- About 45,800 children are born in Utah each year, and in 61 percent of all Utah households with children — more than 553,000 homes — all parents report to work.⁷
- Women's wages support their households. In Utah, 46 percent of Latina mothers, 31 percent of white mothers and 37 percent of AAPI mothers are key family breadwinners. State-level data is limited, but nationally 79 percent of Black mothers and 64 percent of Native American mothers are key breadwinners.⁸

People in Utah both work and provide care

NationalPartnership.org @NPWF 1725 Eye Street, NW, Suite 950 Washington, DC 20006 info@NationalPartnership.org 202.986.2600

- Women make up nearly half Utah's labor force (44 percent) and one-quarter of its business owners (25 percent).⁹
- Across the country, many men want to play a larger role in caring for their children, but unsupportive policies and stigma hold them back.¹⁰

Utah families' care needs are increasing. Paid leave means older adults and disabled people can provide and receive care, and our care workforce is more resilient.

- More than one-sixth of Utah workers are 55 and older,¹¹ and in the next 20 years, Utah's population aged 65 and older will grow by 192,000.¹²
- Nationwide, nearly one third of all adults aged 55-64 and 41 percent of older Black women and 43 percent of older Latinas hold a physically demanding job, ¹³ which may exacerbate or cause serious medical conditions that require care, particularly in older workers and workers with disabilities.¹⁴ In Utah, that would mean 66,700 older workers and 4,100 older Latina workers.¹⁵

The state's caregiving needs are growing

- About 24 percent of Utah nursing homes have a shortage of direct care workers.¹⁶ Paid leave reduces nursing home utilization and can help recruitment and retention of care workers.¹⁷
- An estimated 358,000 Utahns report having long-term COVID-19 symptoms that affect their daily activities.¹⁸ Paid leave is a critical support as we continue through this mass disabling event, which disproportionately impacts women, people of color and workers with low incomes.¹⁹
- Paid leave helps family caregivers and disabled people (who are often caregivers themselves) manage their health and care needs while maintaining their income and employment.²⁰

Utahns need a common sense, national paid leave program. We recommend one that:

- includes all workers, no matter where they live or work or what kind of job they have;
- replaces enough income that workers at any income level can afford leave;

A national paid leave plan is the solution

- provides enough time and covers the range of major needs workers face, including addressing their own health conditions, caring for seriously ill, injured or disabled family members and welcoming newborn, newly adopted or foster children;
- provides education and outreach to ease implementation for workers and small businesses;
- has a sustainable funding source that is affordable for workers, employers and the government without harming other essential programs.

National paid family and medical leave means a stronger economy, healthier families and businesses, and greater equality for all women and families.
