

Paid Leave Means A Stronger Connecticut

JANUARY 2021

Connecticut will soon be home to the eighth state paid family and medical leave program in the United States. Connecticut's plan, which goes fully into effect in 2022, builds on lessons learned from older state programs to be one of the most progressive in the nation, including a progressive wage replacement rate and an inclusive definition of "family" for family caregiving.¹

The coronavirus pandemic will have long-term consequences on Connecticut residents' health, caregiving needs and economic stability.

- ▶ Women, especially Black, Latinx, AAPI and Native American mothers, were hit hardest by pandemic closures, working in many of the most-affected industries and bearing the brunt of increased caregiving without schools or child care.² At the end of 2020, Connecticut's labor force had lost 40,000 workers³ and more than three-and-a-half times as many women were unemployed compared to one year earlier.⁴ If nothing is done, women nationwide will lose \$64.5 billion in wages each year from reduced labor force participation and lower work hours.⁵
- ▶ More than 390,000 Connecticut residents – 17 percent Black, 17 percent Latinx and 4 percent AAPI – work in frontline industries,⁶ facing heightened risks of exposure and challenges managing family caregiving needs.
- ▶ More than 222,000 Connecticut residents contracted COVID-19 in the first year of the pandemic.⁷ An estimated 10 to 15 percent – 22,200 to 33,300 – will experience long-term symptoms including difficulty breathing, chest pain or fatigue that may require care from a loved one or interfere with work.⁸

Paid leave means a more robust, equitable recovery from the pandemic.

Connecticut residents are caught between their work and family responsibilities.

People in Connecticut both work and provide care

- ▶ More than 34,200 children are born in Connecticut each year, and in 77 percent of all Connecticut households with children – more than 530,000 homes – all parents have paying jobs.⁹
- ▶ Women's wages support their households. In Connecticut, 78 percent of Black mothers, 48 percent of white mothers, 64 percent of Latina mothers and 37 of AAPI mothers are key family breadwinners. State-level data is limited, but nationally 64 percent of Native American mothers are breadwinners.¹⁰
- ▶ Women make up nearly half of Connecticut's labor force (49 percent) and more than one-quarter of its business owners (28 percent).¹¹
- ▶ Across the country, many men want to play a larger role in caring for their children,¹² but unsupportive policies and stigma hold them back.¹³

Paid leave means not having to choose between job and family.

Connecticut families will face increased family and medical care needs.

- ▶ More than one in four workers are age 55 and older.¹⁴
- ▶ In the next 20 years, the share of the state’s population age 65 and older will grow by more than one-sixth.¹⁵
- ▶ Older workers are more likely to experience serious medical conditions that require care.¹⁶

The state’s caregiving needs are significant, and growing

Paid leave means older adults and working people of all ages can get the support they need to receive and provide critical care.

Connecticut will soon see the benefits of paid leave for workers, families and businesses.

Connecticut’s paid leave program will soon help tens of thousands

- ▶ Paid leave helps improve health outcomes and helps working people remain economically secure and stay connected to their jobs.¹⁷
- ▶ Businesses’ employee retention can also improve significantly with paid leave, helping to strengthen bottom lines.¹⁸
- ▶ State programs are used as intended by workers without overburdening employers.¹⁹

Paid leave means people – especially women – aren’t forced to leave the labor force to care for their families or health, reducing turnover for employers of all sizes and boosting the economy.

Connecticut will soon add to the growing body of evidence that paid leave programs work – a common sense, tested approach that works for families, businesses and economies.

But people’s access to paid leave shouldn’t depend on where they live or work or what job they hold. The Family And Medical Insurance Leave (FAMILY) Act is a common sense solution that builds on state models to address the country’s paid leave crisis. Seventy-nine percent of 2020 voters – 67 percent of Republicans, 77 percent of Independents and 93 percent of Democrats – support a permanent paid family and medical leave program for people with health needs or child or family care.²⁰

A national paid leave plan – the FAMILY Act – is the solution

The FAMILY Act means a stronger economy, healthier families and businesses, and greater equality for all women and families.
