

Paid Leave Means A Stronger Georgia

JANUARY 2021

The vast majority of working people in the United States do not have paid family leave through their jobs.¹ **In Georgia, even *unpaid* leave under the federal Family and Medical Leave Act is inaccessible for 59 percent of working people.**² As the coronavirus pandemic made clear, the lack of paid leave has had devastating costs to Georgians and their families, public health and the economy.

The coronavirus pandemic will have long-term consequences on Georgians' health, caregiving needs and economic stability.

- ▶ Women, especially Black, Latinx, AAPI and Native American mothers, were hit hardest by pandemic closures, working in many of the most-affected industries and bearing the brunt of increased caregiving without schools or child care.³ In Georgia, more than eleven times as many women were unemployed at the end of 2020 compared to one year earlier.⁴ If nothing is done, women nationwide will lose \$64.5 billion in wages each year from reduced labor force participation and lower work hours.⁵
- ▶ More than 915,000 Georgians – 41 percent Black, 6 percent Latinx and 4 percent AAPI – work in frontline industries,⁶ facing heightened risks of exposure and challenges managing family caregiving needs.
- ▶ More than 792,000 Georgians contracted COVID-19 in the first year of the pandemic.⁷ An estimated 10 to 15 percent – 79,200 to 118,700 – will experience long-term symptoms including difficulty breathing, chest pain or fatigue that may require care from a loved one or interfere with work.⁸

Paid leave means a more robust, equitable recovery from the pandemic.

Georgians are caught between their work and family responsibilities.

People in Georgia both work and provide care

- ▶ More than 126,300 children are born in Georgia each year, and in 71 percent of all Georgia households with children – nearly 1.7 million homes – all parents have paying jobs.⁹
- ▶ Women's wages support their households. In Georgia, 77 percent of Black mothers, 46 percent of white mothers, 42 percent of Latina mothers and 37 of AAPI mothers are key family breadwinners. State-level data is limited, but nationally 64 percent of Native American mothers are breadwinners.¹⁰
- ▶ Women make up nearly half of Georgia's labor force (49 percent) and nearly one-third of its business owners (31 percent).¹¹

- ▶ Across the country, many men want to play a larger role in caring for their children,¹² but unsupportive policies and stigma hold them back.¹³

Paid leave means not having to choose between job and family.

Georgia families will face increased family and medical care needs.

- ▶ More than one in five workers are age 55 and older.¹⁴
- ▶ In the next 20 years, the share of the state’s population age 65 and older will grow by more than one-sixth.¹⁵
- ▶ Older workers are more likely to experience serious medical conditions that require care.¹⁶

Paid leave means older adults and working people of all ages can get the support they need to receive and provide critical care.

The state’s caregiving needs are significant, and growing

Impossible choices between job and family are hurting the economy, and women suffer most.

Georgia’s economy and families are suffering

- ▶ In Georgia, there is a 12 percentage point gap in labor force participation between men and women, in part because the United States lacks family friendly policies.¹⁷
- ▶ Nationally, if women participated in the U.S. labor force at the same rates as women in countries with paid leave, our economy would benefit from more than \$500 billion in additional economic activity each year.¹⁸
- ▶ Paid leave improves employee retention, morale and productivity, strengthening bottom lines – but small employers often cannot provide it on their own.¹⁹

Paid leave means people – especially women – aren’t forced to leave the labor force to care for their families or health, reducing turnover for employers of all sizes and boosting the economy.

A national paid leave plan – the FAMILY Act – is the solution.

Georgians need a common sense solution to address the country’s paid leave crisis.

Georgians need the Family And Medical Insurance Leave (FAMILY) Act, a common sense solution to address the country’s paid leave crisis. The FAMILY Act would reduce the number of working families in Georgia facing significant economic insecurity when they need to take family and medical leave by 79 percent.²⁰ Seventy-nine percent of 2020 voters – 67 percent of Republicans, 77 percent of Independents and 93 percent of Democrats – support a permanent paid family and medical leave program for people with health needs or child or family care.²¹

The FAMILY Act means a stronger economy, healthier families and businesses, and greater equality for all women and families.

For more on the FAMILY Act, visit NationalPartnership.org/theFAMILYAct.
