JANUARY 2021

The vast majority of working people in the United States do not have paid family leave through their jobs. In Maine, even unpaid leave under the federal Family and Medical Leave Act is inaccessible for 65 percent of working people. As the coronavirus pandemic made clear, the lack of paid leave has had devastating costs to Mainers and their families, public health and the economy.

The coronavirus pandemic will have long-term consequences on Mainers’ health, caregiving needs and economic stability.

- Women, especially Black, Latinx, AAPI and Native American mothers, were hit hardest by pandemic closures, working in many of the most-affected industries and bearing the brunt of increased caregiving without schools or child care. At the end of 2020, Maine’s labor force had lost 18,000 workers and more than three-and-a-half times as many women were unemployed compared to one year earlier. If nothing is done, women nationwide will lose $64.5 billion in wages each year from reduced labor force participation and lower work hours.
- Nearly 161,000 Mainers – 2 percent Black, 1 percent Latinx and 2 percent AAPI – work in frontline industries, facing heightened risks of exposure and challenges managing family caregiving needs.
- More than 32,000 Mainers contracted COVID-19 in the first year of the pandemic. An estimated 10 to 15 percent – 3,200 to 4,800 – will experience long-term symptoms including difficulty breathing, chest pain or fatigue that may require care from a loved one or interfere with work.

Paid leave means a more robust, equitable recovery from the pandemic.

Mainers are caught between their work and family responsibilities.

- More than 11,700 children are born in Maine each year, and in 74 percent of all Maine households with children – more than 170,000 homes – all parents have paying jobs.
- Women’s wages support their households. Nationally, 79 percent of Black mothers, 64 percent of Native American mothers, 48 percent of Latina mothers, 48 percent of white mothers, and 43 percent of AAPI mothers are breadwinners.
- Women make up nearly half of Maine’s labor force (49 percent) and more than one-quarter of its business owners (26 percent).
- Across the country, many men want to play a larger role in caring for their children, but unsupportive policies and stigma hold them back.

Paid leave means not having to choose between job and family.
Maine families will face increased family and medical care needs.

- Nearly 30 percent of workers are age 55 and older.\(^{15}\)
- In the next 20 years, the share of the state’s population age 65 and older will grow by nearly one-quarter.\(^{16}\)
- Older workers are more likely to experience serious medical conditions that require care.\(^{17}\)

**Paid leave means older adults and working people of all ages can get the support they need to receive and provide critical care.**

Impossible choices between job and family are hurting the economy, and women suffer most.

- In Maine, there is an 8 percentage point gap in labor force participation between men and women, in part because the United States lacks family friendly policies.\(^{18}\)
- Nationally, if women participated in the U.S. labor force at the same rates as women in countries with paid leave, our economy would benefit from more than $500 billion in additional economic activity each year.\(^{19}\)
- Paid leave improves employee retention, morale and productivity, strengthening bottom lines – but small employers often cannot provide it on their own.\(^{20}\)

**Paid leave means people – especially women – aren’t forced to leave the labor force to care for their families or health, reducing turnover for employers of all sizes and boosting the economy.**

Mainers need a common sense solution to address the country’s paid leave crisis.

**Mainers** need the Family And Medical Insurance Leave (FAMILY) Act, a common sense solution to address the country’s paid leave crisis. The FAMILY Act would reduce the number of working families in Maine facing significant economic insecurity when they need to take family and medical leave by 79 percent.\(^{21}\) Seventy-nine percent of 2020 voters – 67 percent of Republicans, 77 percent of Independents and 93 percent of Democrats – support a permanent paid family and medical leave program for people with health needs or child or family care.\(^{22}\)

The FAMILY Act means a stronger economy, healthier families and businesses, and greater equality for all women and families.
