

Hormonal Physiology of Childbearing: Evidence and Implications for Women, Babies, and Maternity Care

Sarah J. Buckley
January 2015

Contents with Full Outline

Abstract	i
Figures and Tables	iii
Message from Debra L. Ness	iv
Foreword	v
Preface	vii
Acknowledgments	ix
Executive Summary	x
1 Introduction: Overarching Themes and Scope	1
1.1 Human Childbearing: Evolution and Safety	2
1.2 Contemporary Childbirth Practices	2
1.3 Current Understandings of the Hormonal Physiology of Childbearing	4
1.3.1 Benefits for Mothers and Babies	4
1.3.2 Possible Impacts of Maternity Care interventions	5
1.3.3 The Hormonal Physiology Pathway	5
1.4 Alignment with Other Frameworks	7
1.5 Scope of This Report	10
1.5.1 Content and Organization	10
1.5.2 Inclusion of Animal Studies	11
1.6 Introduction: Summary	11
2 Physiologic Onset of Labor and Scheduled Birth	14
2.1 Physiologic Onset of Labor at Term	15
2.1.1 Quiescent Phase	15
2.1.2 Activation Phase	16
2.1.3 Stimulation Phase	18
2.2 Possible Impacts of Scheduled Birth	20
2.3 Physiologic Onset of Labor and Scheduled Birth: Summary	24
2.3.1 Physiologic Onset of Labor	24
2.3.2 Possible Impacts of Scheduled Birth	25
3 Oxytocin	26
3.1 Oxytocin: Normal Physiology	27
3.1.1 Oxytocin: Introduction	27
<i>Oxytocin Effects</i>	28
Physiologic roles of oxytocin	29
Psychological and therapeutic roles of oxytocin	30
<i>Oxytocin Regulation and Receptors</i>	31

	Oxytocin regulation	31
	Oxytocin receptors	31
	Oxytocin complexities	32
3.1.2	Oxytocin in Pregnancy	33
	<i>Maternal Oxytocin in Pregnancy</i>	33
	<i>Fetal Oxytocin in Pregnancy</i>	35
3.1.3	Oxytocin in Labor and Birth	35
	<i>Maternal Oxytocin in Labor and Birth</i>	35
	Other hormonal influences on oxytocin in labor and birth	38
	Positive feedback cycles	38
	Fetal neuroprotection	39
	Oxytocin-deficient mice	40
	<i>Fetal Oxytocin in Labor and Birth</i>	40
3.1.4	Oxytocin after Birth	41
	<i>Maternal Oxytocin After Birth</i>	41
	Oxytocin and maternal-newborn contact and interactions	41
	Oxytocin and postpartum hemorrhage	42
	<i>Newborn and Later Oxytocin</i>	42
	<i>Oxytocin and Breastfeeding</i>	44
	Breastfeeding initiation	44
	Breastfeeding benefits	45
	<i>Oxytocin and Maternal Adaptations and Attachment</i>	46
	Postpartum sensitive period	47
	Skin-to-skin contact	48
	Maternal adaptations	49
	Pleasure and reward	50
	Maternal-infant bonding and attachment	52
3.2	Common Maternity Care Practices That May Impact Oxytocin Physiology	54
3.2.1	Maternity Care Provider and Birth Environment: Possible Impacts on Oxytocin	54
3.2.2	Prostaglandins for Cervical Ripening and Labor Induction: Possible Impacts on Oxytocin	55
3.2.3	Synthetic Oxytocin in Labor for Induction, Augmentation, and Postpartum Care: Possible Impacts on Oxytocin	56
	<i>Induction of Labor</i>	56
	<i>Augmentation of Labor</i>	56
	<i>Synthetic Oxytocin and the Mother</i>	57
	Physiologic versus synthetic oxytocin in labor and birth	57
	Synthetic oxytocin and central maternal oxytocin	60
	Synthetic oxytocin and oxytocin receptor desensitization	61
	Synthetic oxytocin and postpartum hemorrhage	62
	Synthetic oxytocin when administered postpartum	63
	<i>Oxytocin Antagonist Drugs</i>	64
	<i>Synthetic Oxytocin and the Baby</i>	64
	<i>Synthetic Oxytocin and Breastfeeding</i>	66

	<i>Synthetic Oxytocin and Maternal Adaptations and Attachment</i>	68
	<i>Synthetic Oxytocin and the Mother, Longer Term</i>	69
	<i>Synthetic Oxytocin and Offspring, Longer Term</i>	70
	Synthetic oxytocin and offspring, animal studies	70
	Synthetic oxytocin and epigenetics	71
	Synthetic oxytocin and offspring, human studies	72
3.2.4	Opioid Analgesic Drugs: Possible Impacts on Oxytocin Physiology	73
	<i>Opioid Drugs and the Mother</i>	73
	<i>Opioid Drugs and the Fetus/Newborn</i>	74
	<i>Opioid Drugs and Breastfeeding</i>	74
	<i>Opioid Drugs and Offspring, Longer Term</i>	75
3.2.5	Epidural Analgesia: Possible Impacts on Oxytocin Physiology	75
	<i>Epidural Analgesia and the Mother</i>	75
	Epidural analgesia and oxytocin systems in labor	76
	Epidural analgesia and maternal temperature regulation in labor	77
	<i>Epidural Analgesia and the Fetus/Newborn</i>	77
	<i>Epidural Analgesia and Breastfeeding</i>	78
	<i>Epidural Analgesia and Maternal Adaptations</i>	79
	<i>Epidural impacts on Memory and Reward</i>	80
3.2.6	Cesarean Section: Possible Impacts on Oxytocin Physiology	81
	<i>Cesarean and the Mother</i>	83
	<i>Cesarean and the Fetus/Newborn</i>	84
	<i>Cesarean and Breastfeeding</i>	85
	<i>Cesarean and Maternal Adaptations and Attachment</i>	85
	Cesarean and psychological well-being	85
	Cesarean and attachment	86
	<i>Cesarean and Offspring, Longer Term</i>	87
3.2.7	Early Separation of Healthy Mothers and Newborns: Possible Impacts on Oxytocin	88
	<i>Early Separation and the Mother</i>	88
	<i>Early Separation and the Newborn</i>	89
	<i>Early Separation and Breastfeeding</i>	89
	<i>Early Separation and Maternal Adaptations and Attachment</i>	89
	Early separation and attachment	89
	Early separation and maternal well-being	90
3.3	Oxytocin Physiology: Summary	90
3.3.1	Oxytocin: Normal Physiology	90
3.3.2	Common Maternity Care Practices That May Impact Oxytocin Physiology	91
4	Beta-Endorphins	93
4.1	Beta-Endorphins: Normal Physiology	94
4.1.1	Beta-Endorphins: Introduction	94
	<i>Beta-Endorphins Effects</i>	94
	Beta-endorphins and the stress response	95
	Beta-endorphins, other effects	95

	<i>Beta-Endorphins: Regulation and Receptors</i>	96
	Beta-endorphins receptors	96
	Beta-endorphins complexities	97
4.1.2	Beta-Endorphins in Pregnancy	97
4.1.3	Beta-Endorphins in Labor and Birth	98
	<i>Maternal Beta-Endorphins In Labor and Birth</i>	98
	<i>Fetal Beta-Endorphins in Labor and Birth</i>	100
4.1.4	Beta-Endorphins after Birth	100
	<i>Maternal Beta-Endorphins after Birth</i>	100
	<i>Newborn and Later Beta-Endorphins</i>	101
	<i>Beta-Endorphins and Breastfeeding</i>	101
	<i>Beta-Endorphins and Maternal Adaptations and Attachment</i>	
4.2	Common Maternity Care Practices That May Impact Beta-Endorphins Physiology	102
4.2.1	Maternity Care Provider and Birth Environment: Possible Impacts on Beta-Endorphins	103
4.2.2	Prostaglandins for Cervical Ripening and Labor Induction: Possible Impacts on Beta-Endorphins	103
4.2.3	Synthetic Oxytocin for Induction, Augmentation, and Postpartum Care: Possible Impacts on Beta-Endorphins	103
4.2.4	Opioid Analgesic Drugs: Possible Impacts on Beta-Endorphins	104
	<i>Opioid Drugs and the Mother</i>	104
	<i>Opioid Drugs and the Fetus/Newborn</i>	104
4.2.5	Epidural Analgesia: Possible Impacts on Beta-Endorphins	105
	<i>Epidural Analgesia and the Mother</i>	106
	<i>Epidural Analgesia and the Fetus/Newborn</i>	107
4.2.6	Cesarean Section: Possible Impacts on Beta-Endorphins	107
	<i>Cesarean and the Mother</i>	107
	<i>Cesarean and the Fetus/Newborn</i>	108
4.2.7	Early Separation of Healthy Mothers and Newborns: Possible Impacts on Beta-Endorphins	108
4.3	Beta-Endorphins: Summary	109
4.3.1	Beta-Endorphins: Normal Physiology	109
4.3.2	Common Maternity Care Practices That May Impact Beta-Endorphins Physiology	110
5	Epinephrine-Norepinephrine and Related Stress Hormones	111
5.1	Epinephrine-Norepinephrine and Related Stress Hormones: Normal Physiology	112
5.1.1	Epinephrine-Norepinephrine and Related Stress Hormones: Introduction	112
	<i>Epinephrine-Norepinephrine and Related Stress Hormones Effects</i>	112
	<i>Epinephrine-Norepinephrine and Related Stress Hormones: Regulation and Receptors</i>	114
5.1.2	Epinephrine-Norepinephrine and Related Stress Hormones in Pregnancy	115
	<i>Maternal Epinephrine-Norepinephrine and Related Stress Hormones in Pregnancy</i>	115
	<i>Fetal Epinephrine-Norepinephrine and Related Stress Hormones in Pregnancy</i>	116

5.1.3	Epinephrine-Norepinephrine and Related Stress Hormones in Labor And Birth 117
	<i>Evolutionary Model</i> 117
	<i>Maternal Epinephrine-Norepinephrine and Related Stress Hormones in Labor and Birth</i> 118
	Maternal epinephrine-norepinephrine in labor and birth 118
	The fetus ejection reflex 120
	Maternal related stress hormones in labor and birth 121
	<i>Fetal Epinephrine-Norepinephrine and Related Stress Hormones in Labor and Birth</i> 121
	Fetal catecholamine surge 121
	Fetal cortisol 123
5.1.4	Epinephrine-Norepinephrine and Related Stress Hormones after Birth 123
	<i>Maternal Epinephrine-Norepinephrine and Related Stress Hormones After Birth</i> 123
	<i>Newborn and Later Epinephrine-Norepinephrine and Related Stress Hormones</i> 124
	<i>Epinephrine-Norepinephrine and Related Stress Hormones, and Breastfeeding and Maternal Adaptations and Attachment</i> 124
5.2	Common Maternity Care Practices That May Impact Epinephrine-Norepinephrine and Related Stress Hormones 125
5.2.1	Maternity Care Provider and Birth Environment, Including Prenatal and Childbirth Care: Possible Impacts on Epinephrine-Norepinephrine and Related Stress Hormones 125
	<i>Prenatal Care and Stress</i> 126
	<i>Childbirth and Stress</i> 127
	<i>Labor and Birth Stress in Animals</i> 129
5.2.2	Prostaglandins for Cervical Ripening and Labor Induction: Possible Impacts on Epinephrine-Norepinephrine and Related Stress Hormones 130
5.2.3	Synthetic Oxytocin For Induction, Augmentation, and Postpartum Care: Possible Impacts on Epinephrine-Norepinephrine and Related Stress Hormones 130
5.2.4	Opioid Analgesic Drugs: Possible Impacts on Epinephrine-Norepinephrine and Related Stress Hormones 131
5.2.5	Epidural Analgesia: Possible Impacts on Epinephrine-Norepinephrine and Related Stress Hormones 131
	<i>Epidural Analgesia and the Mother</i> 131
	<i>Epidural Analgesia and the Fetus/Newborn</i> 133
5.2.6	Cesarean Section: Possible Impacts on Epinephrine-Norepinephrine and Related Stress Hormones 134
	<i>Cesarean and the Mother</i> 135
	<i>Cesarean and the Fetus/Newborn</i> 135
5.2.7	Early Separation of Healthy Mothers and Newborns: Possible Impacts on Epinephrine-Norepinephrine and Related Stress Hormones 136
5.3	Epinephrine-Norepinephrine and Related Stress Hormones: Summary 138
5.3.1	Epinephrine-Norepinephrine and Related Stress Hormones: Normal Physiology 138

5.3.2	Common Maternity Care Practices that May Impact Epinephrine-Norepinephrine and Related Stress Hormones Physiology	139
-------	---	-----

6 Prolactin 140

6.1	Prolactin: Normal Physiology	141
6.1.1	Prolactin: Introduction	141
	<i>Prolactin Effects</i>	141
	<i>Prolactin Regulation and Receptors</i>	142
6.1.2	Prolactin in Pregnancy	143
	<i>Maternal Prolactin in Pregnancy</i>	143
	<i>Fetal Prolactin in Pregnancy</i>	144
6.1.3	Prolactin in Labor and Birth	144
	<i>Maternal Prolactin in Labor and Birth</i>	144
	<i>Fetal Prolactin in Labor and Birth</i>	145
6.1.4	Prolactin after Birth	145
	<i>Maternal Prolactin after Birth</i>	145
	<i>Newborn and Later Prolactin</i>	146
	<i>Prolactin and Breastfeeding</i>	146
	Prolactin release with lactation	147
	Prolactin receptor theory	147
	<i>Prolactin and Maternal Adaptations</i>	148
6.2	Common Maternity Care Practices That May Impact Prolactin Physiology	149
6.2.1	Maternity Care Provider and Birth Environment: Possible Impacts on Prolactin	149
6.2.2	Prostaglandins for Cervical Ripening and Labor Induction: Potential Impacts on Prolactin	149
6.2.3	Synthetic Oxytocin For Induction, Augmentation, and Postpartum Care: Possible Impacts on Prolactin	150
6.2.4	Opioid Analgesic Drugs: Possible Impacts on Prolactin	151
6.2.5	Epidural Analgesia: Possible Impacts on Prolactin	151
6.2.6	Cesarean Section: Possible Impacts on Prolactin	152
6.2.7	Early Separation of Healthy Mothers and Newborns: Possible Impacts on Prolactin	154
6.3	Prolactin: Summary	154
6.3.1	Prolactin: Normal Physiology	154
6.3.2	Common Maternity Care Practices That May Impact Prolactin Physiology	155

7 Conclusions and Recommendations 156

7.1	Conclusions	157
7.2	Recommendations to Promote, Support, and Protect Physiologic Childbearing	163
7.2.1	Education, Policy, and Consumer Engagement Recommendations	163
	<i>Education</i>	163
	<i>Policy</i>	164
	<i>Engaging and Supporting Childbearing Women</i>	165

7.2.2	Care Practice Recommendations Whenever Safely Possible	165
	<i>Prenatal Care</i>	165
	<i>Postpartum Care</i>	168
7.2.3	Research Recommendation	169
7.3	Conclusions and Recommendations: Summary	169
Appendix: Resources for Learning More and Improving Practice		171
